A Level Product Design Summer Preparatory Work

Type up a (400 word total) Glossary for the following terms below. (Give a circa 40 word definition of what each of the terms means in a design context). You may need to research these terms online. This should take between 1 to 2 hours to complete, then you need to learn i.e. remember what each term means.

Exemplar completed for you:

**Anthropometrics** – The sizes of the human body, for example people’s heights, inside leg measurements, waist sizes, foot lengths etc. Limb pivot and opening angles would also feature as this body size information. Anthropometrics are considered when designing an object to fit most people in a population.

**Ergonomics**

**Inclusivity**

**Ideation**

**Client**

**Design Validation**

**Prototype**

**Iterative Design**

**Kaizen**

**Analysis**

Please bring the above work to your first lesson in September 2019.

We hope you have a fantastic summer break and we look forward to working with you in September.
